In this half-day seminar, receive practical advice from an experienced landscaper, and view step-by-step pictures on simple ways to change your lawn into a lovely and low maintenance native garden. Learn a few important design principles, see before and after pictures, and receive a select list of go-to native plants for sun or shade. Sheet mulching will be demonstrated, along with instruction on improving soil and plant health. A power-packed presentation!

Horticulturist **Deva Luna** has been removing lawns for a decade, working for the Sustainable Landscape and Design firm, EarthCare Landscaping. She is a Bay-Friendly Certified Design Professional as well as a Greywater Installer and lives on the East Side with a huge garden and 75 chickens!

Plus: Book Sale • Refreshments • Free parking

Saturday, October 7, 2017

8:30am-12:30pm
